# Power Apps Awesomeness!

Low-code form builder for  
Power Users

App Presentation  
Versatility

Extremely flexible  
development with  
connectors

Full integration with  
SharePoint list forms

Protect Your Data with  
DLP Policies

Power Automate

# Automate Awesomeness!!

Low-code Workflow  
builder for Power Users

Not limited to Microsoft.  
If you can connect to a  
service, it can start a flow

Extremely flexible  
development with  
connectors

Event driven architecture

Protect Your Data with  
DLP Policies

# Integration

# Data Integration

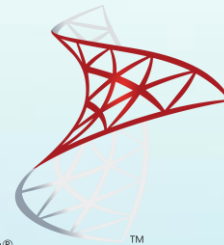

- Many “Out-Of-The-Box” Connectors
  - Means less customization for you just to integrate.

SharePoint Online

Microsoft  
Dynamics 365

Microsoft®  
SQL Server®

# Integrating Everywhere!!

# Demo

- Background:
  - Social Media Organization looking to streamline the process
- Problem:
  - Current process is very manual and requires information and interaction with multiple systems
    - Requests via email
    - Tracking in SharePoint Online
    - Auditing in SQL Server
    - Approver list in MySQL DB
    - Push to Twitter
    - Push to LinkedIn
  - Cannot modify current storage locations

*Face the Future with Confidence*
